

# Data Center Infrastructure Solutions

## Delta<sup>3</sup> Rack System Introduction

### Why Choose Delta<sup>3</sup>?

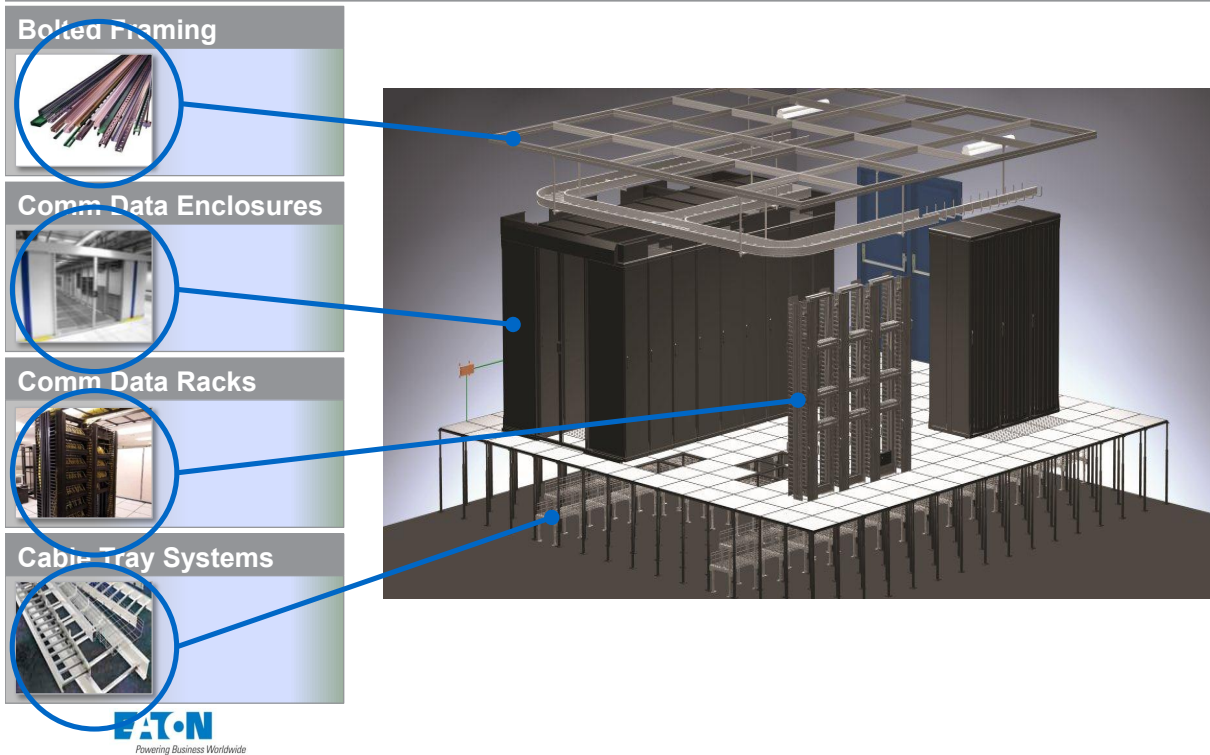

1. Helps reduce installation times for active & passive infrastructure with its open architecture form & design features such as tool-less adjustment of 19-inch rails
2. Reduced remediation times reducing costs for adds / moves / changes
3. Integrated mounting facilities reducing the need to add additional components
4. Designed to allow the optimisation of air management inside the rack envelope
5. Single rack system platform to suit any application simplifying change control & data room optimisation

# Data Center Infrastructure Solutions

## Enhanced data center infrastructure

## Frame Configuration

Offset Post

Offers design flexibility to achieve current best practise as well as catering for the continued evolution of IT equipment such as high density servers and switches.

Centre Post

Optimised data centre solution that provides unrestricted space to install equipment, large cable looms and significantly reduces deployment and remediation costs.

4 Post

Traditional set up for basic installations.
